ABOUT CRIPPACONCEPT

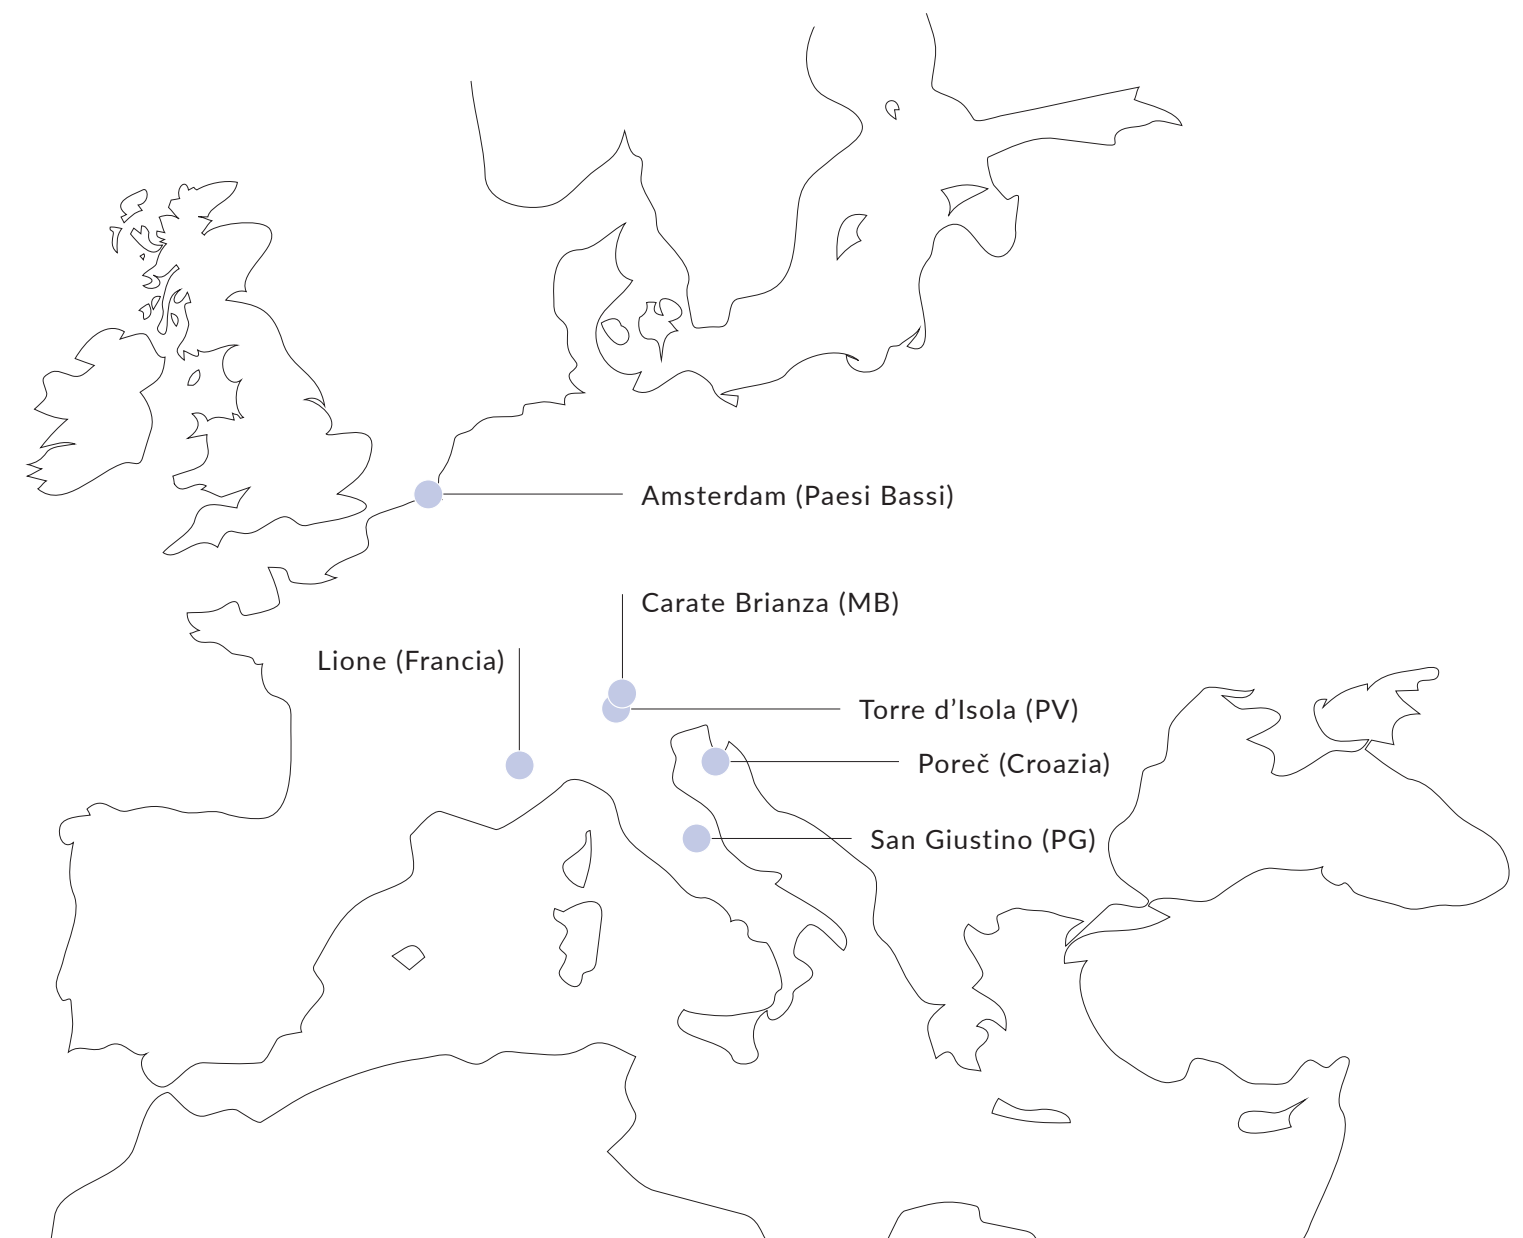

CRIPPACONCEPT: 50 YEARS OF EXCELLENCE IN GLAMOUR CAMPING

Crippacampeggio S.r.l. is among the most authoritative and well-known companies in the culture of glamour camping in Italy and Europe.

Founded in 1975 by the Crippa family as a camping tent manufacturer, it grew and evolved in the 2000s. Since 2010, while maintaining its acquired know-how, it has completely converted its production to create mobile housing units dedicated to the open-air tourism sector.

To strengthen this change in target and production, Crippacampeggio registered the Crippaconcept® brand, which today has established itself as a synonym for high quality and innovation in the mobile home sector.

Thanks to our communication drive and the presentation of cutting-edge housing solutions, we have stimulated a growing demand for alternative hospitality, offering scalable products adaptable to the needs of campsites and tourist villages.

OUR GREEN DNA

Our range of mobile homes represents the pillar of our offer, characterized by the possibility to customize products based on customer needs and the use of increasingly sustainable construction practices. Each year we produce an average of 2,500 housing units, surpassing the milestone of 3,400 mobile homes produced in 2022.

Our mobile homes comply with European standards EN 1647 (user safety and health) and EN 721 (ventilation), ensuring the highest safety standards. Furthermore, our products use recycled rigid PVC and materials from controlled supply chains, helping to reduce environmental impact.

SUSTAINABILITY AND INNOVATION

In response to the need to reduce land consumption, our mobile homes do not require permanent foundations and are easily removable. This feature makes them ideal for sustainable tourism, in line with the European strategy that aims to achieve net zero land consumption by 2050. Our products are present in the most advanced glamping villages and resorts in Italy, Spain, Switzerland, Austria, and Croatia, and since 2021 they have also been distributed in the Netherlands and France. The Italian regions with the highest number of mobile homes include Veneto, Tuscany, Emilia Romagna, Lombardy, and Sardinia.

CRIPPA CONCEPT GOALS

We follow the principles of GRI reporting, prioritizing the most relevant material topics for the environment, economy, and people. We have defined concrete improvement objectives to be developed over the next 3-5 years, always maintaining our principles of well-being, simplicity, innovation, and sustainability.

MADE IN ITALY

OUR COMMITMENT TO MADE IN ITALY

In 2024, we obtained the Made in Italy certification (certificate no. IT01.IT/2790.044.T), which attests to the excellent quality of design and production entirely made in Italy.

50 YEARS OF EXCELLENCE

This year we proudly celebrate our 50th anniversary, a milestone that reflects our constant commitment to offering high-quality, innovative, and sustainable solutions in the glamping and open-air tourism sector.

FREEDHOME 2.0

Freedhome represents a new concept of mobile home: a space filled with comfort, contemporary elegance and style.

Through the use of revolutionary large windows, the interior and exterior have been placed almost in direct contact with one another and therefore blend sumptuously in with the surroundings.

VIDEO TOUR

The unit is enclosed by a protective wood covering, whose effect is to almost dematerialize, to blend into this special environment; all except the living room which is a complete glass space which hinges between the interior and exterior space.

An innovative layout and a real novelty in the design of mobile homes: inside one is decentralised, thus ensuring greater openness and better contact with the veranda and the external environment.

HELIOS

A tribute to the sun, this sustainable unit by Crippaconcept and Matteo Thun & Partners blends elegance, function, and natural light. Its spacious patio invites relaxation, while the HELIOS SYSTEM streamlines production, cuts waste, and enhances harmony—perfect for innovative outdoor hospitality.

HELIOS CLASSIC

The layout of the mobile home is spacious and functional, reflecting the tripartite aesthetic suggested by the exterior design, with which it interacts through large and small windows on all walls. The entrance is accessible from all three sliding glass doors opening onto the patio: the central one provides access to the open space area, consisting of the living room and kitchen, while the side doors to the right and left open onto two bedrooms, each with its own bathroom. The unit can comfortably accommodate up to 5 guests.

HELIOS RIVIERA

HELIOS RIVIERA is Crippaconcept's new interpretation of mobile home living, developed in collaboration with Matteo Thun & Partners. Drawing inspiration from the Mediterranean aesthetic, this model is designed for resorts and operators who want to offer guests a premium stay experience: light-filled interiors, warm neutral tones, and elegant striped fabrics echo the atmosphere of the southern coast.

While maintaining the same industrial efficiency and layout of the HELiOS Classic, RIVIERA introduces a distinctive identity – refined, relaxed, and perfectly in tune with nature-oriented tourism trends.

With its versatile layout and sleeping capacity of up to 5 guests, HELiOS RIVIERA is ideal for camping village, glamping, open air resorts, and open-air destinations aiming to combine comfort, design, and beauty in their accommodation offer.

CORTINA

Combines the atmosphere of glamping with the comfort of a hotel suite, specifically designed to extend the open air season into the colder months. At its core is a spacious sized bedroom with a panoramic view, alongside a private bathrooms, showers, kitchen and living room — ensuring privacy and functionality even in winter.

The structure features high-performance wall and floor insulation, ensuring thermal comfort and energy efficiency.

The living space spans the entire front of the unit and is naturally lit by large integrated windows. When the curtains are drawn open, the interior connects visually and functionally to the terrace, reinforcing the feeling of indoor-outdoor continuity.

Modular heating systems — such as infrared panels or compact heat pumps — can be adapted to different climates and usage needs, supporting energy-conscious operation.

CORTINA is the ideal solution for open-air resorts looking to operate year-round, offering guests a warm, stylish, and sustainable way to enjoy nature — even when it snows.

CORTINA FAMILY

Perfect for couples or families seeking comfort, light and privacy in nature, with functional interiors and generous space for shared experiences.

CORTINA SPORT

Designed for open air lovers and active guests: compact, efficient and robust — ideal for resorts, and nature-based stays plenty of services and where practicality and short stays are key.
